

# Background for perspective

In Honduras the O'Connor's pioneered a new region with the vision "new chains of churches in rural villages". The Lord started many many churches!

What took place? What biblical principles were utilized?

What biblical principles were employed? How can we apply these principles today in new locations in our local?

To start chains of new churches, trainers and local churches must disciple other and minister the correct biblical way:

Remember the basics.

Pray out more workers.

SHARE authority with your apprentices.

Commission new workers & send them in teams.

Provide clear instructions to apprentice workers.

Use only imitable methods.

Help workers plan for house church worship.

Let workers start flocks (in houses of worthy persons) so as to reach whole families.

Encouraging workers to bond with the people & adopt their customs.

Remind workers that they may need to sometimes leave those people & places which reject them.

Proclaim the original and correct Good News.

Report on activities and results.

Listen to workers, as you train them.
